

Agriculture Glossary (English)

Source glossary for English → Telugu SLM-based translation pipeline

Irrigation

The controlled application of water to crops through artificial means such as canals, sprinklers, or drip systems.

Crop Rotation

The practice of growing different types of crops in the same area across sequential seasons to maintain soil fertility.

Fertilizer

A substance added to soil to supply nutrients such as nitrogen, phosphorus, and potassium needed for plant growth.

Pesticide

A chemical or biological agent used to deter, incapacitate, kill, or otherwise discourage pests that damage crops.

Soil Erosion

The gradual wearing away and loss of the topsoil layer caused by wind, water, or poor land management.

Harvest

The process of gathering mature crops from the fields at the end of a growing season.

Yield

The quantity of agricultural produce obtained per unit area of land, often measured in kilograms or tonnes per hectare.

Agroforestry

A land-use system that integrates trees and shrubs with crops or livestock on the same piece of land.

Drip Irrigation

A micro-irrigation method that delivers water directly to plant roots through a network of tubes and emitters.

Organic Farming

A method of crop and livestock production that avoids synthetic fertilizers, pesticides, and genetically modified organisms.

Monoculture

The agricultural practice of growing a single crop species over a wide area for consecutive seasons.

Sowing

The process of planting seeds in soil to begin the growth cycle of a crop.
